AT A GLANCE · 2026

OUR MISSION

To steadily lower world hunger by bringing sustainable development to impoverished regions and delivering fast relief wherever hunger is rampant.

WHO WE ARE

World Hunger Fund began in 2016, born out of relationships with local officials, leaders, and ministers in impoverished communities around the globe, relationships our founders built over years of travel, networking, and outreach.

> *We are a group of simple nobodies with a big vision: a heart to bring lasting change to the impoverished of the world, as impossible as that may seem.*

We work through local people we know and trust, who live in the regions we serve and want to see the right kind of change take place.

WHAT WE DO

Relief → **Development** → **Independence**

Relief gets food and necessities quickly to famines, natural disasters, and war zones. **Development** builds outreach centers, resources, and skills so communities can keep advancing on their own.

World Hunger: The Facts

WorldHunger.fund

Hunger eased for the third year in a row in 2025, but one in every thirteen people on Earth still goes hungry. Here is where things stand.

645M

people faced chronic hunger in 2025

7.8% of the world. That's 14 million fewer than in 2024, but far from the goal of zero hunger by 2030.

2.1B

people are food insecure

25.8% of the world can't count on enough safe, nutritious food all year.

2.7B

can't afford a healthy diet

32.7% of people. A healthy diet costs about $4.28 per person per day.

309M

hungry people live in Africa

About 1 in 5 Africans. Africa now has more hungry people than Asia (292M).

~6,000

young children die every day

From causes linked to undernutrition: about 45% of 4.9 million deaths of children under 5 in 2024.

150M

children under 5 are stunted

23.2% are too short for their age from chronic undernutrition; 42.8 million are dangerously thin (wasted).

831M

live in extreme poverty

Below $3.00 a day. In the poorest countries, most families have under $2 a day to spend on food.

$33B

a year is all it would take

An extra $33 billion a year could end hunger for 490 million people by 2030. Americans spend about $135 billion a year on weight loss alone.

The world's 8.2 billion people, by food security (2025)

Chronically hungry · Food insecure, not chronically hungry · Food secure
